7 Download, DownloadQ: JQuery: Initialization of iBeacon app I am new to IOS development and iphone programming but I have always worked with C# and ASP.net. I have made a simple iphone app in IOS 10 and with the help of the Apple developer manual I have been able to make a functioning app. But I have a problem and it is related to iBeacon. I have included the beacon library as a reference in my XCode project and I can make a beacon manager class in C# but the moment I am trying to initialize an `iBeacon.BeaconManager()` I am getting the error that I have not initialized the "id". So my question is "Is there a way where I can initialize the iBeacon without using the `iBeacon.BeaconManager()` class?" A: Use Beacons new: `var options = new iBeaconTransferOptions() { EnableForegroundTransfer = true }; var`

---

beaconManager =  
CoreLocation.BeaconManager.Instance; beaconManager.StartRangingBeaconsInRegion(new CLBeaconRegion(new CLLocation(0, 0), options)); iBeacon.BeaconManager.StartRangingBeacons(new NSObject[] { }, null, null, 0);
